We use a lot of different filaments when printing with our Flashforge Dreamer machines, and so does you probable, otherwise you wouldn't search for this?

I created this holder to help me solve the issue of other filament spools not really fit inside the Flashforge Dreamer. Thanks to the two side-panel/ windows you can open up and thread filament into the machine from the side.

For more fun while printing, check out this video showing how ridiculously overkill i went when designing it! https://www.youtube.com/watch?v=a63vPWO1oGU

Print Settings

Printer:

All of them!

Rafts:

No

Supports:

No

Resolution:

0.25mm

Infill:

15-35%

Notes:

Print the following:
2x Hanger

1x Chosen rod. (58, 98,118 or 148mm) They can easily be extended/ adapted in a mesh-editor software.

Note. Rods are 20mm in diameter, should fit most spools.

How I Designed This

How it was made and how it works!
